Rennie Sampan

WordPress & Elementor Web Developer
10+ Years Experience

Professional WordPress and Elementor Web Developer with over a decade of experience creating custom websites, managing hosting environments, and solving technical challenges for agencies and small businesses. Skilled in designing responsive, modern websites and maintaining high-performing WordPress ecosystems.

Experienced in handling multi-site event systems, working with marketing teams, managing DNS setups, creating staging environments, and optimizing websites for speed, SEO, and user experience. Currently using AI tools (Claude, ChatGPT, Cursor) and MCP integrations (WPVibe, Novamira) to streamline development and improve productivity.

Core Skills

- WordPress & Elementor Pro development
- Custom post types, taxonomies, and ACF
- Responsive / mobile-first design
- Landing page optimization
- UI/UX layout strategy
- Website maintenance and updates
- Speed optimization and Core Web Vitals
- On-page SEO and structured data (Schema)
- DNS setup (A Records, CNAME, subdomains)
- Staging and deployment workflows
- Plugin conflict resolution and troubleshooting
- Cloudflare setup (CDN, security, caching)
- HTML, CSS, JavaScript basics

AI Tools & MCP Integrations

- Claude (AI coding and development assistance)
- ChatGPT (research, content, troubleshooting)
- Cursor (AI code editor)
- WPVibe MCP (WordPress MCP integration)
- Novamira MCP (AI automation and WordPress workflows)

Other Strengths

- Fast execution under deadlines
- Strong problem-solving skills
- Works well with cross-functional teams
- Comfortable managing multiple projects simultaneously
- Open to learning new tools and technologies

Professional Experience

WordPress Developer
Sep 2026 – Present

Charlotte SEO · Part-time · Remote (United States)

- Designed and developed responsive WordPress websites using Elementor and Elementor Pro.
- Built and customized landing pages, service pages, and SEO-focused website sections.
- Implemented clean, user-friendly layouts optimized for desktop, tablet, and mobile devices.
- Customized WordPress themes, templates, widgets, forms, headers, footers, and other site components.
- Applied on-page SEO best practices, including optimized headings, page structure, content placement, internal linking, and metadata.
- Improved website performance, usability, and overall visual consistency.
- Troubleshot WordPress and Elementor issues and made ongoing website updates based on project requirements.

WordPress Developer
Apr 2026 – Aug 2026

P1peline · Full-time · Remote (Hong Kong SAR)

- Developed and maintained WordPress websites using Elementor, ensuring responsive and user-friendly experiences across all devices.
- Created, customized, and updated website pages, templates, and layouts based on project specifications.
- Implemented website enhancements, content updates, and functionality improvements.
- Troubleshoot technical issues and provided ongoing website support.
- Collaborated with cross-functional teams to deliver website projects on schedule.
- Optimized website performance, loading speed, and overall user experience.
- Maintained website structure and content management processes for long-term scalability.
- Assisted in website migrations, deployments, and hosting-related tasks.

WordPress Developer
Feb 2026 – Mar 2026

Nova Capital Consulting LLC · Part-time · Remote (United States)

- Collaborated with Joseph Lang to develop and launch the Nova Capital Consulting website using WordPress and Elementor.
- Built and maintained websites for multiple blue-collar service businesses.
- Created responsive layouts and custom page designs to enhance user experience.
- Implemented website updates, content management solutions, and ongoing maintenance.
- Optimized website speed, performance, and SEO fundamentals.
- Managed hosting environments, website deployments, and technical troubleshooting.
- Ensured website functionality, security, and reliability through regular updates and monitoring.

Web Developer
Jan 2023 – Sept 2025

Akolade · Remote

- Managed and developed 20+ event websites per year using WordPress and Elementor.
- Built dynamic speaker pages, schedules, and landing pages using Elementor + ACF.
- Maintained consistent branding across multiple event sites.
- Troubleshot technical issues for ongoing conferences.
- Optimized pages for speed, accessibility, and SEO.
- Supported staging → live deployments for each event cycle.
